BELL

The power to shape the future of motor graders

With over twenty years of experience distributing, maintaining, and repairing motor graders, along with insights from local and international experts, Bell has a clear understanding of what is important to make this product work optimally.

While preserving a familiar control and layout, Bell has integrated advanced components and features that enable operators to improve productivity, manage costs, and deliver work efficiently.

With three base models, each available in four- or six-wheel drive configurations, Bell has a solution whatever your application.

- » The G140: Ideal for maintenance and light to medium construction tasks.
- » The G160: Designed for heavy construction with increased power and performance.
- » The G200: Perfect for bulk earthworks and mining applications.

Grade with confidence...

Making the grade...

Combining power and efficiency

Enjoy an enhanced operator experience with minimised distractions thanks to seamless power delivery, allowing full focus on grading tasks.

Powered by renowned Cummins engines, Bell Motor Graders deliver unmatched performance, efficiency and durability.

Powered by renowned Cummins engines, Bell Motor Graders deliver unmatched performance, efficiency, and durability. Each model is equipped with a ZF transmission specifically designed to enhance its capabilities—the G140 features the ZF Ergopower Automatic, while the G160 and G200 are fitted with the advanced ZF cPower hydromechanical

transmission. These transmissions ensure smooth, continuous power delivery across all conditions, optimizing drivetrain efficiency and enhancing the operator experience by minimizing distractions and improving overall performance.

Effortless direction change

The shuttle shift feature on these transmissions eliminates the need for an inching pedal. This allows operators to switch seamlessly between forward and reverse gears with just a press of a button for reduced operator fatigue and enhanced productivity.

Superior control and accuracy

Set a maximum speed for the grader to prevent accidental speeding. Use cruise control to maintain a constant travel speed to reduce operator fatigue, especially during long passes.

Traction when you need it

The auto disengagement of the diff lock and 6WD ensures traction when you need it and provides protection to the machine when you don't.

Ultimate operator comfort and control

The Bell Motor Grader is designed with ultimate operator comfort in mind, ensuring reduced fatigue and increased productivity. With ergonomically engineered controls and exceptional visibility, operators can work with ease and confidence

Inside the cabin

The large ROPS/FOPS certified cab caters for operator protection and provides unobstructed visibility and climate-controlled comfort.

Control is always crucial on motor graders and the Bell range has intuitive controls with a 30-button sealed switch module (SSM), and a sealed 6WD selection controller for applicable models. The 7" colour display is multifunctional for monitoring machine operation,

including diagnostics and easily navigated using the automotive mouse (B-drive).

Clear vision

The operator's superior visibility of the drawbar, pavement/curb and front tyre pegs is a clear competitive advantage that helps to improve accuracy,

Cab with joystick controls

enable precise alignment with minimal material waste, and reduce potential hazards.

Suspension seat

A fully adjustable air suspension seat with variable damping, auto height adjust according to operator weight, pneumatic lumbar support and multipoint harness for class-leading comfort and safety.

Intuitive controls

The advanced speed control allows precise control for optimal grading performance.

An analogue high-definition (AHD) camera system affords enhanced situational awareness ensuring clear visibility through the 7" monitor.

Fast, Easy maintenance

All filters and oil sample points are conveniently grouped on one side of the machine for easy access from ground level through a single door, which reduces maintenance time and effort.

Control Options to Suit Every Operator

The Bell Motor Grader range offers operators the flexibility to select their preferred control configuration, with the option of traditional Antler controls or advanced Joystick controls. This allows for alignment with operator familiarity and comfort, whether favouring antler controls or joystick controls, ultimately enhancing productivity on the job.

Built for the toughest challenges

The Bell Motor Grader is engineered to excel in the most demanding conditions, delivering unmatched durability, power, and precision. With a robust frame, high-performance hydraulics, and advanced technology for superior control, it ensures optimal grading efficiency on any terrain. Whether tackling heavy-duty construction, mining, or road maintenance, this machine is built to withstand the toughest challenges while maximizing productivity and uptime.

Precision circle

A sealed slew bearing is standard across the range to maintain precision.

It delivers consistent mouldboard accuracy due to minimal wear and requires less maintenance compared to open gear designs. Furthermore, adjustable mouldboard inserts can be adjusted in five minutes and are designed to maximise the life of the wear inserts.

Blade impact absorption accumulator (optional)

This innovative system acts like a shock absorber, minimising the impact on the blade during accidental contact with curbs, rocks, or other obstacles.

Tandem axle

The tandem axle is designed with long distance operation in mind. This is supported by enhanced trunnion bearing life and integrated axle cooling for extended brake life.

Parallelogram design ripper

The parallelogram design of the two-cylinder, cantilevered ripper maintains an efficient ripping angle regardless of depth. The consistent tooth angle ensures optimal performance throughout the working range. The tilting ripper beam provides a better departure angle when retracted, and the high lift design improves transport clearance.

The main frame

The main frame is a single piece construction built to eliminate fatigue on fabricated joints.

Engineered to suit your application

Bell Motor Grader offers advanced design features that give operators maximum control and flexibility to tackle a variety of tasks with precision. Whether it's adjusting blade positioning for fine grading, enhancing maneuverability in tight spaces, or maintaining alignment on uneven surfaces, the grader's adaptable functionality ensures performance is tailored to your needs.

Two position drawbar

The two mounting positions allow you to adjust the drawbar height depending on the tyre size. This ensures the drawbar remains level, preventing the mouldboard corners from digging or lifting as you rotate the circle during grading.

Enhanced Maneuverability

The front wheels can lean left or right, enhancing traction and stability on slopes or tough surfaces. This feature reduces side pull, ensuring precise and efficient grading. The crab walk feature allows the grader's front and rear wheels steer in the same direction, allowing diagonal movement without changing orientation. This is especially useful when working around windrows,

ensuring continuous grading without disturbing material placement.

The Cooling package

The coolers are housed in a box design, ensuring easy cleaning and enhanced cooling efficiency with no stacked coolers. The cool-on-demand reversible fan is self-cleaning, minimizing daily maintenance. It also operates with reduced noise and improved fuel efficiency.

Machine features...

ZF TRANSMISSION AND CUMMINS

ENGINE for a combination of fuel-saving technology, low maintenance, and increased reliability

COOL ON DEMAND

Efficient engine and hydraulic cooling is maintained through proportional fan speeds and the automatic reverse

SHUTTLE SHIFT

Smooth and fast changes between forward and reverse without the need to stop the vehicle or engage the inching function.

CANTILEVERED RIPPER

This design maintains the tines at the most efficient ripping angle, ensuring effective performance regardless of the ripping depth.

TANDEM AXLE

Designed for long distance roading with larger trunnion bearing and integrated axle cooling

AUTO DIFF LOCK

It disengages and re-engages automatically without the operator's interference.

PRECISION CIRCLE

The design ensures enhanced grading accuracy and reduces wear and complex maintenance.

HYDRAULIC FLOW

Increased pump capacity improves efficiency of the various functions at lower Engine RPMs

CAB EXPERIENCE

Best-in-class ROPS/FOPS certified cab with superior ergonomics and excellent visibility of the blade and front wheels.

GOOSENECK STRUCTURE

The single piece gooseneck design offers improved durability with no joint in the middle of the chassis.

6WD Wheel Adaptor

The Bell 6 WD (wheel-drive) Motor Graders have a wheel adaptor that allows you to use the same wheel-rims on both the front and rear axles of the grader, regardless of whether it is a 4WD or 6WD configuration.

6WD

Provides better traction in challenging terrain and additional pushing power for moving heavy loads.

G140 SPECIFICATIONS

ENGINE	6x4	6x6
MANUFACTURER AND MODEL	Cummins QSB6.7

DRIVETRAIN	6x4	6x6
MANUFACTURER AND MODEL	ZF CP290	
TRANSMISSION DESCRIPTION	cPower	
NUMBER OF SPEEDS: Forward	Inf	
NUMBER OF SPEEDS: Reverse	Inf	
FRONT AXLE	Heavy duty welded fabrication with integrated lean bar lock	
FINAL DRIVES	Inboard-mounted planetary sealed in cooled, filtered oil	
BRAKES	Foot-controlled, hydraulically operated, multiple wet-disc brakes sealed in pressurized, cooled, filtered oil; both independent systems effective on all 4 tandem wheels	
PRIMARY AND SECONDARY BRAKES	Hydraulically actuated, inboard of tandem pivot, self-adjusting, sealed in cooled and filtered oil, multi-disc (ISO 3450).	
PARK BRAKE	Automatically spring applied, hydraulically released, oil cooled, self-adjusting (ISO 3450)	
FRONT AXLE OSCILLATION (Total)	32 deg.	
FRONT WHEEL LEAN	20 deg.	
DIFFERENTIAL	Spiral bevel gear system, hydraulically actuated with a clutch-type mechanism, allowing differential lock engagement while the machine is in motion. It can be applied in both manual and automatic differential lock modes.	
TANDEM AXLE OSCILLATION (Total)	30 deg.	
STEERING	Hydraulic frame articulation for maneuverability and productivity; crab steering reduces side drift, positions tandems on firm ground, and increases side-slope stability	
TYRE SIZE - STANDARD	20.5R25	
SERVICE BRAKE TYPE	Multiple Wet Discs	
SERVICE BRAKE ACTUATION	Hydraulic	
GROUND CLEARANCE FRONT AXLE	605 mm (23.8 in.)

SPEED		
Forward Gear 1	3.8 kph (2 mph)	
Forward Gear 2	5.5 kph (3 mph)	
Forward Gear 3	8.2 kph (5 mph)	
Forward Gear 4	12.1 kph (7 mph)	
Forward Gear D	0 - 44,8 kph (0 - 28 mph)	
Reverse Gear 1	3.7 kph (2 mph)	
Reverse Gear 2	5.3 kph (3 mph)	
Reverse Gear 3	7.9 kph (5 mph)	
Reverse Gear 4	11.6 kph (7 mph)	
Reverse Gear D	0 - 44.8 kph (0 - 28 mph)	
Top Speed Forward	44,8 kph (28 mph)	
Top Speed Reverse	44,8 kph (28 mph)	

6-WHEEL DRIVE	6x4	6x6
FRONT WHEEL DRIVE		Yes
DESCRIPTION		A hydrostatic drive to improve vehicle traction and benefit control of the front wheels. The system can be activated electronically in realtime whilst operating. It consists of independent left/right circuits, utilising variable displacement pumps coupled to auto-shifting two speed motors. When not active the circuits use an efficient freewheeling mode. The system enables inching mode as well as precision mode (a front wheel only drive mode).
PUMPS		Rexroth
PUMP DISPLACEMENT		56 cm3 (3.4 cu. in.)
FRONT WHEEL MOTORS		Poclain
MOTOR DISPLACEMENT		2 238 cm3 (137 cu. in.)
REDUCTION		None
6WD MAX SPEED		35 kph (22 mph)
PRECISION MODE MAX SPEED		10 kph (6 mph)

HYDRAULICS	6x4	6x6
TYPE	Variable displacement axial piston pump	
PUMP DISPLACEMENT	100 cc / rev	
PUMP FLOW, L / min (US-Gallons / min)	220 L / min (58 gal / min)	
RELIEF PRESSURE	18 961 kPa (2 750 Psi)	

KINEMATICS	6x4	6x6
CIRCLE SIDE SHIFT	789 mm (31 in)	
FRAME CIRCLE DIAMETER	1 500 mm (59 in)	
CIRCLE DRIVE	Hydraulic geroller motor driving a reduction worm box with overload wetplate clutch	
CIRCLE TYPE	Precision Circle: Sealed and lubricated slewing bearing, requiring no adjustment. Mounted between the drawbar and circleframe, which are welded and machined structures.	
CIRCLE ROTATION	360 deg.	
STEERING ANGLE, DEG	48 deg.	
TURNING RADIUS - MINIMUM	7,22 m (23 ft. 8 in.)	
FRAME ARTICULATION (EACH WAY)	22 deg.	

G200 SPECIFICATIONS

CAPACITIES	6x4	6x6
FUEL TANK (REFILLING CAPACITY)	400 L (106 US gal.)

Advanced technological solutions for monitoring, accuracy and safety

Bell Motor Graders combine cutting-edge technology with seamless system integration to maximize productivity, grading precision, and on-site safety.

Grading System Integration

Bell Motor Graders are agnostic and can seamlessly integrate with a variety of third-party technologies, including 2D and 3D grading systems of the customer's choice. This versatility allows customers to connect the grader to their preferred precision grading solutions, enabling high levels of grading accuracy and operational efficiency.

Fleetm@tic® Monitoring & Efficiency Management

Bell Fleetm@tic® monitors and manages both the machine and the operator's performance. Machine

operational data is collected, processed, and compiled into valuable production and performance statistics, which are accessible via automated reports or the Fleetm@tic® website.

Enhanced Safety Through System Connectivity

Bell Motor Graders support connectivity with third-party L9 pedestrian detection systems and collision avoidance systems through the ISO 21815-2 Interface. This advanced safety integration helps enhance job site awareness and reduce incidents, making the Bell grader a safer, smarter machine.

The Future of Grading, Now

Experience the next evolution in grading. Our motor graders offer unparalleled precision, power, and performance, taking grading to the next level with advanced technology and operator-focused design.

Bell Equipment,
refining the future of motor graders.

All dimensions are shown in millimetres, unless otherwise stated between brackets.
Under our policy of continuous improvement, we reserve the right to change technical data and design without prior notice. Photographs featured in this brochure may include optional equipment.
